

COMMANDER'S INTENT

1. Build a cohesive command. Maintain and build productive partnerships to enable production.
2. Maintain and build a production capability that satisfies current and future fleet airframe, engine and component maintenance requirements. Maintain and build close productive relationships with your customers.
3. Treat your workforce as your most precious asset.
4. Maintain and improve quality and safety.
5. Energetically support movement of Depot capability into Intermediate sites consistent with BRAC law.
6. Aggressively implement *AIRSpeed* to reduce cost, turnaround time and WIP.
7. Exceed your allocated contribution to BRAC savings.
8. Continuously seek ways to improve effectiveness and efficiency.
9. Identify any resources or enablers required to support above intents that are outside your control and inform higher Headquarters.
10. Clearly communicate, in a timely manner, any issue or risk that requires attention of higher Headquarters.

RDML Michael Hardee
Commander, Fleet Readiness Centers
